Introducing Python

Dr. Jeeva Jose
Associate Professor
Department of Computer Applications
BPC College, Piravom
vijojeeva@yahoo.co.in

Python's Founder – Guido Van Rossum

A Brief History

- Python was conceived in late 1980s.
- Implemented in December 1989 at Centrum Wiskunde & Informatica which is a research center in Netherlands.
- Inspired from Monty Python's Flying Circus – A BBC Comedy show

Python Features

- Free Open Source Software
- Python is Interpreted
- Least lines of code compared to C,C++, Java

Application of Python

- YouTube, DropBox and Instagram
- Web development frame works like Django, Bottle, Flask and Pyramid for Frame work.
- Numpy is a collection of mathematical packages for matrices and arrays.
- SciPy is a collection of packages for Mathematics, Science, and Engineering.
- Pandas is a data analysis and modeling library in Python.
- Sklearn is a package for machine learning.

Python Application Domains

- **Biology**
- **Geography**
- **Language Processing**
- **Astrology**
- **Data Mining**
- **Embedded Systems**
- **Customer Relationship Management (CRM)**
- **Content & Document Management**
- **E-Commerce**
- **Enterprise Resource Planning (ERP)**
- **Manufacturing**
- **Product Development**
- **Project Management**
- **Relational Online Analytical Processing (ROLAP)**
- **Simulation**
- **Network Programming**
